Stream Cleanup Programs

Month of April!

keep the Potomac Watershed clean from any location of your choice.

Contact the District for support and supplies or register with

[Alice Ferguson Foundation](#)

The District promotes 4 options for cleaning streams/creeks:

1. **Adopt-A-Stream / Adopt-A- Creek Program** - clean at least once a year for a two year commitment (Any time)
2. **Potomac River Watershed Cleanup** (Alice Ferguson Foundation)- one-time cleanup
3. **International Coastal Cleanup** (Clean VA Waterways) -one-time cleanup (September- October)
4. **Earth Team Volunteer Cleanup** - one time cleanup(Any time)

Are you ready for a stream/creek cleanup this Spring?

Free supplies are available with the District

For some cleanup sites in your neighborhood, click [here](#)

On how to get started with any of the stream cleanup programs or have any questions about which of the 4 options is best for you, please contact: waterquality@pwsxcd.org.

Water Quality Monitoring

Some Answers to your Questions

How often can a site be monitored?

Not more than 4 times in a year (quarterly).

What does it take to become certified?

1. Be able to [identify the critters](#).
2. Be able to properly [demonstrate the field protocol](#) in data collection.

Both 1 and 2 are easy and open book!

Must I be a certified stream monitor?

No, you can help the existing monitoring teams, too! But DEQ only accepts data that comes from certified stream monitors.

What is recommended before taking the certification test?

Take part in at least 2-3 stream monitoring events before sitting for the certification test.

Assess and trace trash that load into streams to reduce non-point source pollutant from urbanized and industrialized areas. This program is related to the County's Municipal Separate Storm Sewers (MS4) permit. It is recommended for volunteers to dress in boots.

-DEQ's 2016 Citizen/Non-Agency Monitoring Activity Report

Each year, the Virginia Department of Environmental Quality (DEQ) develops a report summarizing the contributions of monitoring organizations to the agency's water monitoring program. The 2016 report is available on the agency's [Follow-Up Monitoring](#) website.

- Incorporating Citizen Science Into EPA's National Environmental Work

One of the challenges of running a citizen science program like stream monitoring is that one can never be entirely sure what the program's impact will be. To that end, an EPA advisory body recently submitted a report to agency leadership recommending that the EPA proactively and fully integrate citizen science into its work, embrace it as a core tenet of environmental protection, and use citizen science data directly. The full report can be [found online](#). Please direct comments to Green.Eugene@epa.gov and citizenscience@epa.gov.

Rain Barrels for Prince William Residents- Order before May 20th

[Barrel pick up date](#)- : May 20th

[Pick up address](#): *Dumfries Town Hall, 17755 Main Street , Dumfries VA.*

The District is currently taking orders for rain barrels. \$75.00 each or \$140.00 for two with limited quantity available.

Rain barrels help to save water cost during the summer months for lawns and gardens watering. The collected rainwater also helps to reduce the volume of rainwater from impervious surfaces which contribute to non-point source pollution within the Chesapeake Bay Watershed.

The barrels are made in the USA with 90% recycled material.

To reserve your barrel, contact **Alice Markiewicz** at education@pswcd.org or send a check payable to **PWSWCD** (*Address the check to: 8850 Rixlew Lane Manassas VA 20109*).
